PROJECTS

Oct 2022— Mar 2022	**Crime Analysis and Prediction System (CAPS)**

CAPS is a web-based application which helps law enforcement agencies to efficiently analyze the crime and predict future hotspots to reduce the crime in that area.
Link: https://crimeanalysis-project-hosting.onrender.com

Features:

1) Dashboard (Total crimes committed, detected, not detected)
2) Charts (view, search)
3) Crime Section (Register, view, search)
4) User Section (Register police, view, update, admin/normal, deactivate/activate)
5) Predict Hotspot (A separate section to predict hotspots on given date and crime type)
6) View and search criminals
7) Dashboard also includes notification section in which tomorrow's major hotspots mentioned
